Laurel County Proud Program

The Laurel County Proud Program is similar to the Kentucky Department of Agriculture's Kentucky Proud Livestock Tag Program. The goal is to offer additional incentives to youth, promote sales opportunities for Laurel County producers, and highlight the quality of animals raised in our community.

- To be eligible for the program, the animal must be born in Laurel County, Kentucky.
- The program is limited to pigs, goats, sheep, and cattle.
- The animal must be tagged as Laurel County Proud at the time of validation.
- The deadline to purchase a Laurel County Proud tag for a feeder calf, market steer or market heifer and breeding animals will be July 1, 2023.
- The deadline to purchase a Laurel County Proud tag for market lambs, goats, and hogs will be July 1, 2023.
- Laurel County producers can purchase Laurel County Proud tags for \$10 each. The fees collected for the sale of tags will be used to pay added premiums to students who show Laurel County Proud animals.
- If a youth's project animal was born on their own family's farm, the student must still have the eligibility form completed and have the animal tagged as Laurel County Proud to be eligible for the program.
- Added premiums for Laurel County Proud will be paid on the Danish system.

POINT CALCULATION FOR CORNETT AWARD AT LAUREL COUNTY FAIR

Points are calculated only on placings for the Laurel County Shows. Participation in the District shows does not add additional points. In the case of ties, the tied parties each receive the same overall points.

1. Scores for skill-a-thon are calculated. Novices, Juniors and Seniors are listed together based on test score. The individual that places first gets 10 overall points, 2nd gets 9 points, 3rd gets 8 points, 4th gets 7 points, 5th gets 6 points, 6th gets 5 points, 7th gets 4 points, 8th gets 3 points, 9th gets 2 points, 10th gets 1 point. All other participants also get 1 point.

2. Scores for the judging contest are calculated. Novices, Juniors and Seniors are listed together based on contestant total. Individual points are assigned based on same basis as skill-a-thon. 10 points for 1st, 9 points for 2nd, etc. all contestants get at least 1 point.

3. Showmanship points. Every time an individual enters the ring for showmanship, he/she earns placing points but not necessarily overall points. Placing points are based on the child's placing in their showmanship class for every species. For example: Child A wins his class in goat showmanship, is 3rd in swine showmanship and then is 5th in cattle showmanship. That child has earned 24 placing points, but these are not overall points. This total is used to determine rank for overall showmanship points. Child B is 1st in goat showmanship, 5th in swine showmanship, 6th in sheep showmanship and 4th in cattle showmanship. Child B has earned 28 placing points. The showmanship placing points are then totaled for every child that has competed at the fair and then the child with the most placing points receives 10 overall points, 2nd highest total receives 9 points, right down the line to 10th place in placing points receiving 1 overall point. Every child that shows in showmanship will receive at least 1 overall point. It is to a child's advantage to enter the showmanship for numerous species. A child can win his class in a species but receive fewer overall points than a child who is 5th in show A and 6th in show B. This is also the reason that all classes (even the novice classes) must be placed top to bottom.

4. Animal points. Every time a child enters a class with their animals, they receive placing points. No points are awarded for Grands, Reserves, Divisions, etc. The point distribution is just like in showmanship. 1st place gets 10 placing points, 2nd place gets 9 placing points...down to 10th

place getting 1 placing point. Every animal shown will receive at least 1 placing point. Once all the shows are finished at the end of the week, total placing points are calculated. The child with the most placing points gets 10 overall points, 2nd highest total gets 9 overall points...right down to the 10th highest total for placing points getting 1 overall point. Any child not receiving enough placing points to be in the top 10 will also receive 1 overall point. Again, it is to a child's advantage to show as many animals as possible to receive more placing points so that their total placing points will rank them higher and thus receive more overall points. Even though there may only be 1 animal in a particular class that child will receive 10 placing points for that animal. The child that owns the animal receives the points regardless of who shows the animal. ***Again, a child that receives first place with a steer will receive fewer overall points than a child that has 2 goats that finish 5th and 6th respectively.

4-H ENTOMOLOGY & HONEY
Division 6026 – 4-H ENTOMOLOGY & HONEY
Blake Newton - Staff Consultant

1. See General Rules applying to all 4-H exhibitors and 4-H exhibits other than livestock listed previously in this catalog.
2. **Each county may have 1 entry per class. An exhibitor may enter only one class in Entomology and no more than two entries in Honey (one extracted, one chunk).**
3. Specifications for pinned-insect exhibits 687A, 688A, 689A, 690A, and 691A (see below for insect photography exhibit, 687B, 688B, 689B, 690B, 691B):
 - a. 9" x 13" folding cardboard insect-collection boxes available through UK College of Agriculture, Department of Entomology, should be used. Homemade or purchased wooden exhibit boxes may be used instead. They must be approximately 18" x 24" and not more than 3 1/2" thick with Plexiglas or glass covers and cellotex pinning bottoms (or plastazote or polyethylene pinning bottoms available from entomology supply stores such as Bioquip.com). Boxes must be easily opened (for instance; if a screw is used to secure Plexiglas tops, use a thumbscrew fastener instead of a fastener that requires a tool).
 - b. Specimens are to be arranged so the box can be exhibited horizontally. 4-H'ers may attach wires to the back of wooden boxes to help make them easier to display.
 - c. Identification labels available from your County Extension Office must be used, or custom labels may be printed if they conform exactly to the font, font size, and font color of the official labels. Labels should be printed onto white cardstock. The exhibit identification card should be placed on the front of the box (each box). Instructions for pinning and labeling are included in your project literature.
 - d. One half of the specimens may be from the previous year's collection or from anywhere in the United States; one half or more must be Kentucky insects collected since the last Kentucky State Fair. No insects that were originally collected from countries outside of the United States will be judged.
 - e. For the first through fifth year projects, a display collection catalog must be in an envelope attached to the back of the display box. Envelopes should be attached to permit their being opened easily to remove catalogue from them without moving the exhibit.
 - f. Most specimens in the display cases should be pinned, and the use of vials is discouraged. If vials are used, they may account for no more than 2% of a collection. Vials must be securely wired or pinned to the pinning bottoms.
 - g. The inclusion of non-insect specimens (spiders, e.g.) is encouraged, but because this is primarily an insect collection, and because non-insects do not preserve well on insect pins, points will be deducted if there are more than one specimen from each non-insect class.
4. Pinned entomology exhibits are judged on the following categories: Orders, Species, Common Names, Labels, Condition of Specimens, Overall Appearance, Life Cycle Representation, Catalog of Specimens. Check with county 4-H Agent for point distribution on score sheet.
5. Exhibits will be penalized if they do not:
 - a. Use insect pins for pinning insects.
 - b. Use the 4-H Entomology identification labels.

- c. Use display boxes that are not the official 9" x 13" cardboard boxes acquired through the Dept. of Entomology, or wooden boxes that are approximately 18" x 24" x 3 1/2".
 - d. Fulfill the requirements of the particular exhibit under which it is entered.
 - e. Have the insects arranged so the box can be exhibited horizontally.
 - f. Have the display collection catalogue in an envelope attached to the back of the display box through fifth year projects.
- 6. No extra credit will be given for specimens exhibited beyond the numbers listed in the current project books.
 - 7. 4-H'ers entering fifth year cannot use the same exhibit that has been judged in any previous State Fair.
 - 8. 4-H Entomology exhibits will be divided into the following classes:

687A First year project (Up to three 9" x 13" official cardboard boxes, or up to two 18" x 24" wooden boxes, with minimum of 25 insects, maximum 50 insects, from at least four orders. Identification beyond order not necessary. All specimens must have date and locality label.)

687B First year project (minimum of 25 insect photographs, maximum 50 photographs, from at least four orders. Identification beyond order not necessary. All photographs must have notation field.)

Specifications for insect photography exhibits:

- a. Images will be submitted on a USB memory device (such as a "thumb drive") with no other data except for the images and folders. The USB device must be identified externally with a tag or label, showing "4-Her's last name-County-Lot Number-Class Number-Entry Number." The single root folder will be labeled with the same information. Images will be contained inside this folder. Example folder name: Doe-Fayette-6026-687a-24531
 - b. Each image will be .jpg format, 1920X1080 pixels. Vertical or horizontal black bars may be present to allow for cropped images.
 - c. Each image will have a filename that matches the following: "lastname-county-#.jpg," where "#" indicates the number of the image inside the folder. Example filename: Doe-Fayette-1.jpg
 - d. Each image will include a 400X225 pixel (or larger if necessary) white notation box with important information about the photo. This notation field may be placed anywhere inside the image, including inside black bars (if present). Fonts may vary based on the 4-Her's software, but we recommend Ariel, 18pt, black, non-bold. The notation field will include the following information, with one space between each line:
 [4-Her's Name, County, Lot Number, Class Number]
 [Date of original photograph]/[Location of original photograph. Location may be in the form of a street/city/zip code address or GPS coordinates.]
 [Brand and type of camera or camera phone]
 [Settings, including type of lens, relevant camera settings, and "flash" or "no flash"]
 [Insect Order – Common Name]
- 1. First year entomology photography exhibits are judged on the following categories: Orders, Species, Common Names, Labels, Quality of Photograph. Check with county 4-H Agent for point distribution on score sheet.
 - 2. Digital insect collections will be penalized if they:
 - a. Consist of images that were created by someone other than the 4-Her
 - b. Are not submitted and labeled according to guidelines
 - 3. No extra credit will be given for photographs submitted beyond the numbers listed in the current project books.

- 688A Second year project (Up to three 9" x 13" official cardboard boxes, or up to two 18" x 24" wooden boxes, with minimum of eight orders and not less than 50 insects, nor more than 100 insects.) Half of the insects should be identified with a common name.
- 688B Second year project (50-100 photographs total, minimum of 8 orders, at least one-half identified with a common name). Specifications for exhibits are the same as for 687B except that no images from the first-year photography project may be reused for this project.
- 689A Third year project (Three 9" x 13" official cardboard boxes, or two 18" x 24" wooden boxes, with a minimum of 10 orders and 100 insects, a maximum of 150 insects.)
- 689B Third year project (100-150 photographs total, minimum of 10 orders, all identified with common names except immature stages. Photos of at least one arthropod egg, nymph, larva, and pupa—identified to order, no common name needed—should be included as a part of the 100-150 photos). Specifications for exhibits are the same as for 688B except:
- Each image will include a 400X300 pixel (or larger if necessary) white notation box with important information about the photo. This notation field may be placed anywhere inside the image, including inside black bars (if present). Fonts may vary based on the 4-Her's software, but we recommend Ariel, 18pt, black, non-bold, or larger. The notation field will include the following information, with one space between each line:
 [4-Her's Name, County, Lot Number, Class Number]
 [Date of original photograph]/[Location of original photograph. Location may be in the form of a street/city/zip code address or GPS coordinates.]
 [Brand and type of camera or camera phone]
 [Settings, including type of lens, relevant camera settings, and "flash" or "no flash"]
 [Insect Order – Common Name (if applicable)]
 [Life stage identified for all non-adult arthropods]
 - Third year entomology photography exhibits are judged on the following categories: Diversity, Inclusion of life stages, Identification, Labels, Quality of Photographs. Check with county 4-H Agent for point distribution on score sheet.
 - Identification to order (or class for non-insect arthropods) is necessary for any eggs, nymphs, larvae, pupae, and adult insects in the project; common name identification is necessary for all adult arthropods in the project.
- No images from previous insect photography projects may be reused for this project.690A
 Fourth year project (Three 9" x 13" official cardboard boxes, or two 18" x 24" wooden boxes, with minimum of 12 orders and 150 insects, no maximum) An addition cardboard or wooden box with an example of insect damage, the stage of the insect causing the damage and any other stage of the insect that helps identify the problem. Include information in the display that tells how the insect is controlled. Life cycle of two insects may be displayed if desired.
- 690B Fourth year project (150 photographs minimum, no maximum, 12 orders minimum, all identified with common names except immature stages. Photos of at least one arthropod egg, nymph, larva, and pupa—identified to order, no common name needed—should be included as a part of the 150+ photos). Specifications for exhibits are otherwise the same as for 689B. No images from previous insect photography projects may be reused for this project.
- 690C Junior Level Entomology Video Project. 1-3 minute entomology video submitted to social media platform (YouTube or TikTok), focusing on one insect or insect relative (including arachnids, centipedes, millipedes, and crustaceans) that lives in Kentucky. Specifications:
- a. Video may be created on any video-editing platform and may include editing, cuts, text, special effects, filters, still images, music, and narration.

- b. The final video will be uploaded by the 4-Her onto YouTube or TikTok, either to an account managed by local County Extension staff or to an account managed by the 4-Her. If the County Office is managing the account, they will provide a link to the video to blaken@uky.edu. If the 4-Her chooses to upload the video with privacy settings, the final video may be shared as a link to blaken@uky.edu (for YouTube videos) or direct messaged to [@kentucky_bugs](https://www.tiktok.com/@kentucky_bugs) (for TikTok videos) prior to St. Fair project submission deadlines.
- c. The video should begin with an introduction from the 4-Her which includes the following information: First Name, County Name, Name of Project ("Junior Level Kentucky 4-H Entomology Video Project"), Common Name of Insect (or insect relative), Scientific Order Name of Insect (or insect relative).
- d. The 4-Her may appear in the video if they elect to do so and if they have a H-328 photo consent form on file (<https://entomology.ca.uky.edu/file/photo-imageconsentformh328pdf>). The inclusion of 4-H logos (such as on a T-shirt, or on a County Extension sign) in the video is encouraged. Videos may be used by the University of Kentucky on websites or social media for education or entertainment purposes.
- e. The video should focus on a single kind of native or non-native insect or insect relative that lives wild in Kentucky. The video does not have to focus on a single species, but needs to be more specific than the Order level. For instance, a video on "wolf spiders" would be acceptable, but "spiders" would be too general for this project. Similarly, "lady beetles" would be an appropriate topic, but "beetles" is too general.
- f. The video may cover any factual information about the creature including: habitat, feeding strategies, defense, range, life cycle, impacts to humans, conservation status. Additional content, (such as folklore, humor, or personal experiences with the creatures) may be included, but should account for less than 50% of the content. Information may be delivered via narration (live or overdubbed), text/subtitles, or a combination.
- g. Any media used in the video must be generated by the 4-Her. Images, video clips, music or sound clips from other creators should not be used, with the exception of background music licensed for use by individual social-media platforms.

691 Fifth year project (may be repeated for successive years of eligibility but must be a different exhibit. No exhibit that has been judged in any previous State Fair may be entered.) Any type of display that pertains to experiences beyond those of previous projects. Special collections of native and/or exotic butterflies, beetles to some other insect order; a study in depth of one insect or small group of insects: a display of insect camouflage: a display of plastic embedded insects: a collection of insect larvae and nymphs are examples. Charts, photographs, models or any other visual aids may be used. 4-H'ers are encouraged to write a short (1 or 2 paragraphs) statement developing the theme of their fifth year display.

691 B 4-Her may repeat the fourth year project with all new photographs, or submit a creative digital project that is different from the previous projects. Examples may include: a documentary on a beneficial or pest insect based on video footage and photos curated by the 4-Her; a webpage covering an aspect of entomology, featuring the 4-Hers digital photographs; a short online social-media course that teaches viewers about some aspect of entomology. This project may be repeated for successive years of eligibility but must be a different exhibit each year (or a repeat of the 4th year project with new photos).

691C Senior Level Entomology Video Project. 1-3 minute entomology video submitted to social media platform (YouTube or TikTok), focusing on one insect or insect relative (including arachnids, centipedes, millipedes, and crustaceans) that lives in Kentucky. Specifications: same as 690C except for Senior level.

Dried Apples

Recipe adapted from the **Put It Up! Food Preservation for Youth** curriculum from the National Center for Home Food Processing and Preservation, University of Georgia Cooperative Extension and Clemson Cooperative Extension

2 to 3 apples of your choice

2 cups vitamin C-enriched apple juice (enough to cover the apples when sliced)

Cooking spray

1. If you are using an electric dehydrator, plug it in (so that it is not touching anything) with the lid on the base. If you are using an oven, slide oven racks to be 2 to 3 inches apart and turn on oven. Preheat dehydrator or oven to 140°F.
2. Wash apples under cool running water.
3. Place enough apple juice in a bowl to cover the apples when sliced.
4. Core and peel the apples. Cut away any bruised or damaged areas. Carefully cut apples into 1/8-inch thick pieces, either as slices or rings.
5. To prevent browning, place the apple pieces into the bowl of juice as they are cut. Soak the apple pieces in the juice for 3 to 5 minutes.
6. Spray drying tray lightly with cooking spray. This will prevent sticking.
7. Remove the apple pieces from the juice, place briefly on paper towels to remove excess juice, and then place the pieces in a single layer on the drying tray. Place the drying tray into the preheated dehydrator or oven.
8. Dry at 140°F for approximately 6 to 12 hours in a dehydrator. Plan to start checking for doneness in 3 hours and check every hour or half-hour until done. Oven drying may take 12 to 24 hours. If using an oven, leave the door cracked open to allow moist air to escape. Place a fan outside the oven near the door to speed up drying time.
9. When dry, the apple pieces should be bendable, but not sticky. If a piece is folded in half, it should not stick to itself. You should not be able to squeeze any moisture from the fruit. Do not let the apples dry so long that they become crispy.
10. After drying, cool the dried apples 30 to 60 minutes before packaging. Packaging warm fruit could lead to sweating and mold growth.
11. Once they are cool, put the dried apples into a sealable airtight container. Label the container with the name of the fruit and the date.

UK Extension Publication HE 3-501 may be helpful.

For the fair: Place 12 pieces of dried fruit in a container which is an example of a container suitable for long term storage of dried fruit. Label package with kind of fruit and date processed. The container may be larger than needed for 12 pieces. Judging will be based on suitability of container, not size.

Boiling Water Canning

Follow these general instructions for boiling water canning Choice Salsa, Dill Pickles or Strawberry Jam.

Prepare canner and jars:

1. Assemble equipment and ingredients.
2. Place rack in bottom of boiling water canner. Fill canner half full with clean, hot water and place on burner. Turn heat on medium-high to heat water in canner to the temperature specified in each recipe (180°F, simmering, for hot packed Choice Salsa and Strawberry Jam; 140°F, almost simmering, for raw packed Dill Pickles).
3. Only use jars that were specifically made for home canning. (Do not re-use containers such as mayonnaise jars.) Use only the jar sizes specified in each recipe. Examine jars carefully. Discard any with cracks or chips in the rim. Examine ring bands and discard any with rust or bends.
4. Wash jars thoroughly in warm soapy water, rinse well, and place them in the canner to stay warm until ready to use.
5. Wash ring bands and prepare lids as instructed by the manufacturer.
6. Heat 3 to 4 cups hot water in a medium saucepan for adding to canner, if needed.

Prepare the recipe:

As directed for each product.

Fill the jars:

1. Slowly remove jars from hot water with jar lifter. Carefully empty any water back into the canner. Place jars upright on towel-covered countertop or rack.
2. Fill jars as directed in each recipe, leaving the required headspace. Headspace is the gap between the top of the food and the top of the jar rim. Measure headspace with headspace tool or ruler to ensure it is correct.
3. Remove air bubbles by slowly moving bubble freer or nonmetal spatula gently in and out around the inside edge of each jar. Check headspace of each jar again and gently add or remove liquid with a small spoon, if needed.
4. Wipe jar rims with a clean, damp paper towel.
5. Apply lids according to manufacturer's directions. Turn band onto jars until fingertip tight. Fingertip tight is when you meet firm resistance as you turn the band onto the jar using your thumb and two fingers.

Boiling water processing:

1. Use a thermometer to check that the temperature of the water in the canner is the temperature specified in the recipe (180°F for Choice Salsa or Strawberry Jam; 140°F for Dill Pickles). Adjust burner higher or lower, if necessary.
2. Use a jar lifter to carefully place filled jars one at a time on the rack in the canner. Keep jars upright at all times. Make sure water is 1 to 2 inches above tops of jars. Add hot water from the saucepan if needed, pouring between jars rather than directly on top of jars.

3. Place lid on canner and turn heat to high. Bring water in canner to a strong boil and then start a timer, using the time specified in the recipe for your altitude. *Be sure to maintain a steady boil throughout the entire timing process.*
4. Once the timer goes off, turn off heat. Remove canner lid, lifting the underside of the lid away from you to direct the steam away from your face. Wait 5 minutes for the contents of the jars to settle.
5. After 5 minutes of cooling, remove jars from the canner one at a time using a jar lifter, keeping them upright. Be careful not to tilt them. Place jars at least 1 inch apart on a dry towel or cake-cooling rack. Place away from drafts of moving air.
6. Let jars cool, undisturbed, for 12 to 24 hours. Check jars for vacuum seals. The lids on sealed jars will be indented and will not flex when pressed.
7. Remove ring bands from sealed jars and wipe jars. Store in a cool, dark, dry place. Store unsealed or opened jars in the refrigerator and eat within one week.

Choice Salsa

Recipe is from the **Put It Up! Food Preservation for Youth** curriculum from the National Center for Home Food Processing and Preservation, University of Georgia Cooperative Extension and Clemson Cooperative Extension.

6 cups (about 5 pounds) tomatoes (red, orange, yellow or green)

9 cups (about 3 pounds) onions and/or peppers of any variety*

1½ cups commercially bottled lemon or lime juice

3 teaspoons canning or pickling salt

About 6 pint (or 12 half-pint) canning jars

*Red, yellow or white onions may be used and will slightly affect the overall flavor. More bell peppers make a milder salsa, while hot chili peppers make a spicier salsa. It is important to the safety of the salsa that you use no more than 9 cups total of onions and peppers.

1. Prepare canner and jars as directed in **Boiling Water Canning**, heating to 180°F (simmering).
2. *Peel tomatoes:* Fill a stockpot with enough water to cover several tomatoes at a time. Bring water to a boil while preparing tomatoes. Fill a large bowl with ice (if you have it) and cold water. Wash tomatoes. Cut an "x" in the non-stem end of tomatoes with the tip of a small knife. Place 2 to 3 tomatoes at a time in boiling water for 30 to 60 seconds or until skins split. Remove tomatoes with a slotted spoon and place in cold/ice water. Slip off tomato skins and discard them. Place tomatoes on a clean cutting board.
3. Carefully use a knife to remove the firm inner core from tomatoes. Coarsely chop tomatoes (into blueberry-sized pieces).
4. Peel, rinse, trim and dice onions in ¼-inch pieces.
5. *Bell peppers:* Rinse peppers. Remove stems, seeds and membranes. Dice peppers in ¼-inch pieces.
6. *If using hot peppers:* Place food handling gloves on both hands. Rinse and dry hot peppers. Remove stems and remove the seeds and membranes, unless you want more spicy heat. Dice hot peppers into very small pieces. Remove and discard gloves. Wash hands well.

7. Measure and combine 9 cups of peppers and onions with 6 cups of tomatoes in a large stockpot. You can vary the individual amounts of peppers and onions to suit your taste, but be sure that they measure 9 cups in total. Measure and add 1½ cups bottled lemon or lime juice and 3 teaspoons salt. Stir to mix ingredients evenly.
8. Heat to boiling over high heat and then reduce to a simmer and cook for 3 minutes, stirring as needed to prevent scorching.
9. Remove hot jars from canner and fill as directed in **Boiling Water Canning**, leaving ½-inch headspace. Use a jar funnel for neater filling and be sure to release air bubbles and adjust headspace if needed. Wipe jar rims and apply lids.
10. Process in a boiling water canner as directed in **Boiling Water Canning**. Process pint or half-pint jars for 15 minutes at altitudes of 1,000 feet or below; 20 minutes at altitudes of 1,001-6,000 feet.

For the fair: Replace ring band on jar, if it was removed for storage. Complete 4-H Canning Label and affix to jar.

Dill Pickles (recipe revised 10-14-2018)

Recipe is from the **Put It Up! Food Preservation for Youth** curriculum from the National Center for Home Food Processing and Preservation, University of Georgia Cooperative Extension and Clemson Cooperative Extension.

Ingredients below are for 6 to 7 pint jars

About 9 pounds (36) pickling cucumbers, 3 to 4 inches long

3 cups water

3 cups vinegar (5% acidity)

6 tablespoons canning salt

9 to 11 heads of fresh dill or 3 to 3½ tablespoons dried dill weed or dill seed

3 to 3 ½ tablespoons whole mustard seed

3 to 7 cloves of garlic (optional)

About 6 to 7 pint (or 12 to 14 half-pint) canning jars (use wide mouth jars for easier packing)

1. Prepare canner and jars as directed in **Boiling Water Canning**, heating to 140°F (almost simmering).
2. Rinse cucumbers in a colander immediately before using. Scrub well, giving special attention to the area around the stems.
3. Remove a 1/8-inch slice off the blossom end of each cucumber and discard. If stem is still attached, cut off all but ¼ inch. Carefully slice the cucumbers lengthwise and then lengthwise again to create spears.
4. If using fresh dill, chop leaves finely with scissors, separating into small piles of 1½ heads per pile. If using garlic, peel and slice cloves into thin slices.
5. *Make the pickling brine:* Combine 3 cups water, 3 cups vinegar and 6 tablespoons salt in a large saucepan. Bring to a boil over high heat

6. Remove hot jars from canner as directed in **Boiling Water Canning**. Place 1½ heads of chopped fresh dill or 1½ teaspoons dried dill weed or dill seed in the bottom of each pint jar. Add 1½ teaspoons mustard seed to each pint jar. Add ½ to 1 clove of sliced garlic to each pint jar, if desired. (Use one-half those ingredient amounts if using half-pint jars.)
7. Pack cucumber spears tightly into the jars, leaving ½-inch or more of headspace. (If using half-pint jars, it may be necessary to trim the length of the cucumber spears.) Ladle boiling pickling solution over the cucumbers in the jars, leaving ½-inch headspace. Use a jar funnel for neater filling and be sure to release air bubbles and adjust headspace if needed, as directed in **Boiling Water Canning**. Wipe jar rims and apply lids.
8. Process in a boiling water canner as directed in **Boiling Water Canning**. Process pint or half-pint jars for 10 minutes at altitudes of 1,000 feet or below; 15 minutes at altitudes of 1,001-6,000 feet.
9. For best flavor, store sealed jars for 3 weeks before eating.

For the fair: Replace ring band on jar, if it was removed for storage. Complete the 4-H Canning Label and affix to jar.

Strawberry Jam (with Regular Pectin)

Recipe is from the **Put It Up! Food Preservation for Youth** curriculum from the National Center for Home Food Processing and Preservation, University of Georgia Cooperative Extension and Clemson Cooperative Extension.

5 cups crushed strawberries (about 4 pints strawberries)*
 1 package powdered pectin
 7 cups sugar
 About 8 half-pint (or 16 4-ounce) canning jars

*Strawberry jam is best made with fresh-picked, in-season berries. If you use store-bought berries, be sure to mash them up very well or you will get a lot of floating fruit and trapped air in the final product.

1. Prepare the canner and jars as directed in **Boiling Water Canning**, heating to 180°F (simmering). If you are using 4-ounce jars and need to double-stack them, place a second canning rack on top of the first layer of jars. Continue to place jars in a single layer on top of this second rack.
2. Rinse strawberries in a colander immediately before using. Do not soak berries. Gently lift them out of water. Remove caps.
3. Cut out and discard bruised spots, if needed.
4. Thoroughly crush berries one layer at a time in a deep baking pan or cookie sheet using a potato masher. It is helpful to place a damp dish towel or slip-proof mat under the pan to prevent sliding.
5. Premeasure 7 cups sugar into a bowl and set aside.
6. Measure 5 cups crushed strawberries and add to a stockpot.
7. Add 1 package of regular pectin to strawberries and stir well. Turn burner under stockpot to high heat, stir constantly, and bring to a full boil (bubbles over the entire surface).

8. Add the premeasured 7 cups sugar, continue stirring, and heat again to a full rolling boil. Boil hard for 1 minute, stirring constantly. Do not boil longer. Longer boiling may damage the pectin bond, causing jam to soften.
9. Remove from heat; quickly skim foam from top with a slotted spoon.
10. Remove hot jars from canner and fill as directed in **Boiling Water Canning**, leaving ¼-inch headspace. Use a jar funnel for neater filling and check and adjust headspace if needed. Wipe jar rims and apply lids.
11. Process in a boiling water canner as directed in **Boiling Water Canning**. Process half-pint or 4-ounce jars for 10 minutes at altitudes up to 6,000 feet. If needed, 4-ounce jars can be stacked in the canner by placing a second rack on top of the first layer of jars and placing a second layer of jars on top of this rack. Make sure water is 1 to 2 inches above tops of all jars.

For the fair: Replace ring band on jar, if it was removed for storage. Complete 4-H Canning Label and affix to jar.

Pressure Canning

Follow these general instructions for pressure canning Green Beans and other low-acid foods (vegetables, meats, poultry, and combination recipes).

Prepare canner and jars:

1. Assemble equipment and ingredients.
2. Place rack into pressure canner. Add 2 to 3 inches of water and place on burner. Turn burner on medium-high to heat water in canner to 140°F (almost simmering) for a raw pack, or 180°F (simmering) for a hot pack.
3. Only use jars that were specifically made for home canning. (Do not re-use containers such as mayonnaise jars.) Use only the jar sizes specified in the recipe. Examine jars carefully. Discard any with cracks or chips in the rim. Examine ring bands and discard any with rust or bends.
4. Wash jars thoroughly in warm soapy water and rinse well. To keep jars warm until use, either fill jars with hot water and place upright in the canner or cover jars with hot water in a clean, drain-plugged sink.
5. Wash ring bands and prepare lids as instructed by the manufacturer.

Prepare the recipe:

As directed for raw pack or hot pack.

Fill the jars:

1. Remove jars from hot water with jar lifter and pour water out in sink (not in canner). Place jars upright on towel-covered countertop or rack.
2. Fill jars as directed in the recipe, leaving the required headspace. Headspace is the gap between the top of the food and the top of the jar rim. Measure headspace with headspace tool or ruler to ensure it is correct.
3. Remove air bubbles by slowly moving bubble freer or spatula gently in and out around the inside edge of each jar. Check headspace of each jar again and gently add or remove liquid with a small spoon, if needed.
4. Wipe jar rims with a clean, damp paper towel.
5. Apply lids according to manufacturer's directions. Turn band onto jars until fingertip tight. Fingertip tight is when you meet firm resistance as you turn the band onto the jar using your thumb and two fingers.

Pressure canner processing:

1. Use a thermometer to check that the temperature of the water in the canner is as specified in the recipe (140°F for a raw pack; 180°F for a hot pack). Adjust burner higher or lower, if necessary.
2. Use a jar lifter to carefully place filled jars one at a time on the rack in the canner. Keep jars upright at all times. Water level will rise, but should not cover jar tops. Remove water if needed.
3. Place lid on canner and close tightly, but leave the weight off the vent port. Turn heat to high. Wait until you see steam form a funnel as it comes out of the vent port, and then set a timer for 10 minutes. Allow steam to escape for 10 minutes to vent the canner (remove excess air).

4. After the canner has vented for 10 minutes, place the weight or close the vent port to begin pressurizing the canner.
5. Determine how many pounds of pressure are needed for processing at your altitude. For a weighted gauge canner, this is 10 pounds at altitudes of 1,000 feet and below; 15 pounds at altitudes above 1,000 feet. For a dial gauge canner, it is 11 pounds at altitudes of 2,000 feet and below; 12 pounds at altitudes of 2,001 to 4,000 feet; or 13 pounds at altitudes of 4,001 to 6,000 feet.
6. Wait until you can see and hear the weight steadily jiggling as recommended by the manufacturer (for a weighted gauge canner) or the dial indicates the recommended pressure (for a dial gauge canner). Set the timer for the processing time specified in the recipe. Once the recommended pressure is reached, you may lower the heat very slightly so that pressure does not rise too high, but be careful. *If at any time the pressure drops below the recommended level, you must bring the canner back to pressure and reset the timer to the full recommended processing time.*
7. When the timer sounds, turn off the heat. Allow the canner pressure to drop naturally as the canner cools. Wait until the pressure returns to 0 pounds (if the canner has a vent lock, it will drop) and then wait 2 more minutes. If the canner gives no indication of the remaining pressure, set a timer for 45 minutes to allow time for the pressure to drop to zero. Carefully check that the pressure is gone before removing the weight from the vent port.
8. After removing the weight, wait 10 minutes for the contents of the jars to settle. Remove the canner lid, lifting the underside of the lid away from you to direct the steam away from your face.
9. Remove jars from the canner one at a time using a jar lifter, keeping them upright. Be careful not to tilt them. Place jars at least 1 inch apart on a dry towel or cake-cooling rack. Place away from drafts of moving air.
10. Let jars cool, undisturbed, for 12 to 24 hours. Check jars for vacuum seals. The lids on sealed jars will be indented and will not flex when pressed.
11. Remove ring bands from sealed jars and wipe jars. Store in a cool, dark, dry place. Store unsealed or opened jars in the refrigerator and eat within one week.

Green Beans

Recipe is from the **Put It Up! Food Preservation for Youth** curriculum from the National Center for Home Food Processing and Preservation, University of Georgia Cooperative Extension and Clemson Cooperative Extension.

8 to 9 pounds green beans ($\frac{3}{4}$ to 1 pound per pint)

9 cups water

4½ teaspoons canning salt (optional)

About 9 pint canning jars

1. Prepare the canner and jars as directed in **Pressure Canning**, heating to 140 °F (just below simmering) for a raw pack or 180°F (simmering) for a hot pack. See step 5, below.
2. Fill a large saucepan with 9 cups water to be used to fill jars. Cover saucepan with lid and turn heat on high to bring to a boil.

3. Use a colander to rinse beans. Discard any discolored or diseased bean pods.
4. Use your clean hands to snap the ends off the beans, and then snap the beans into 1-inch pieces. Or, use a small knife to cut off ends and slice into 1-inch pieces.
5. Green beans can be canned using either a raw pack or a hot pack. Raw packs are quicker, but hot packs tend to have the best color and flavor. *Choose one of the packs below for filling jars and process as directed.*

Raw Pack:

6. Remove jars from hot water as directed in **Pressure Canning**, pouring the water out in the sink (not in the canner).
7. Use a jar funnel and clean fingers to push raw beans tightly into hot jars, leaving 1-inch headspace.
8. Add ½ teaspoon salt to each jar, if desired.
9. Using a ladle, fill each jar with boiling hot water to cover beans, leaving 1-inch headspace.
10. Remove air bubbles and adjust headspace if needed, as directed in **Pressure Canning**. Wipe jar rims and apply lids.
11. Process pint jars for 20 minutes in a pressure canner, as directed in **Pressure Canning**. Be sure to vent the canner before pressurizing and use the correct processing pressure for your altitude and type of canner.

OR

Hot Pack:

6. Place beans into the boiling water in the saucepan for 5 minutes. Turn off heat.
7. Remove jars from hot water as directed in **Pressure Canning**, pouring the water out in the sink (not in the canner).
8. Use a jar funnel and slotted spoon to fill the hot jar with the heated beans, leaving 1-inch headspace. Repeat to fill each jar.
9. Add ½ teaspoon salt to each jar, if desired. Using a ladle, fill each jar with the boiling hot cooking liquid to cover the beans, leaving 1-inch headspace.
10. Remove air bubbles and adjust headspace if needed, as directed in **Pressure Canning**. Wipe jar rims and apply lids.
11. Process pint jars for 20 minutes in a pressure canner, as directed in **Pressure Canning**. Be sure to vent the canner before pressurizing and use the correct processing pressure for your altitude and type of canner.

For the fair: Replace ring band on jar, if it was removed for storage. Complete 4-H Canning Label and affix to jar.

DIVISION 6028 – GEOLOGY
Dr. Steve Greb – Consultant
Kentucky Geological Survey
228 Mining and Mineral Resources Bldg.
University of Kentucky
Lexington, KY 40506-0107
859-323-0503

Project entry must meet all the requirements for the class; otherwise, the entry may be disqualified. County agents should make sure that 4-H collections meet these requirements.

1. See General Rules applying to all 4-H exhibitors and general rules applying to all exhibits other than livestock listed previously in this catalog.
2. Only one entry per 4-H member permitted in Geology.
3. Only one entry per county per project year.
4. 4LO-1150 Identification Card should be securely attached to the lower right hand corner of the front of the box.
5. To fit into the State Fair display shelves, display boxes must be no less than 14 inches and no more than 17 inches vertically and no less than 16 inches and no more than 24 inches horizontally. The depth of the display boxes should be no more than 4 inches. NOTE: The size of the display box has changed from previous years. If you are using an old display box for your collection, note that the display will not be disqualified for 2020 but points may be deducted.
6. All boxes must have Plexiglas cover that can be easily removed for judging.
7. Each exhibit must be secured with a lock. Attach a key to the box with your name and county firmly attached to key. Key will be returned to 4-H agent. Keep another key in case State Fair key is misplaced.
8. Hinges and locks must be flush and mounted on sides or top of boxes so boxes will sit level.
9. If fabric is used, use a fabric glue to adhere entire piece of fabric to box. Suggested fabrics are felt or velveteen.
10. Rocks, minerals, and fossils should be firmly attached to the box. See Rule 12 for label information.
11. Boxes will be displayed on their side, not flat. Therefore, larger specimens must be attached near the lower portion of the box.
12. Rock, Mineral, and Fossil Identification Labels are available from the County Extension Agent for 4-H or 4-H the Kentucky Geological Survey (KGS) website (<http://www.uky.edu/KGS/education/4H.htm>). These are the only labels acceptable.

13. Specimens that are polished may lose points.
14. Exhibits may be disqualified for class champion if:
- a. Box does not fit in the size stated in rule 5
 - b. Box contains too few or too many specimens
 - c. Box does not have a Plexiglas cover that can be opened
 - d. Labels are not correctly filled out (see instructions and examples at the KGS website <http://www.uky.edu/KGS/education/4H.htm>).
 - e. Specimen is mounted jewelry
 - f. The specimen is not clearly numbered on the label (the judge is unable to determine which specimen goes with which label).
 - g. Specimens are not arranged in numerical order
 - h. Duplicate specimens are used to reach minimum number. However, varieties of the same rock or mineral are acceptable if the specimen is identified by a different name (i.e., quartz, smoky quartz, amethyst, agate, chert, flint or calcite, Iceland spar, aragonite, travertine). Also acceptable if the duplicate specimen has an adjective in front of the specimen (i.e., calcite, red calcite, or limestone, fossiliferous limestone, oolitic limestone). If each entry in that class has duplicate named specimens, then each entry may qualify for class champion, but will not be eligible for grand champion.
14. The following score card will be used to judge geology exhibits:
- a. Correct identification and labeling - 5 points for each specimen (Collections will be judged more favorably that have different types of specimens, rather than many different varieties of the same rock, mineral, or fossil; i.e., gray limestone, light gray limestone, dark gray limestone, or red calcite, blue calcite, green calcite).
 - b. Cards/specimen: 1 point each that each specimen has the label completely filled out, along with specimen number.
 - c. Found on site: Since this is an exercise in becoming familiar with rocks, minerals, and fossils, an extra 1 point will be given for specimens that are found rather than purchased or given as gifts. (Be sure to ask permission if you have to enter private property. The Internet is a good place to search for rock clubs and geological surveys of your and other states for information on collecting localities.)
 - d. Neatness, arrangements, background - 20 points for total exhibit
15. Class champion will be selected in each class with a Grand Champion and Reserve Grand Champion selected from Class Champions.
16. 4-H'ers entering fifth year and up cannot enter the same exhibit that has been judged in any previous State Fair.

Class information is provided on next page.

Classes Are:

For each of the classes, specimens may consist of rocks, minerals, and or fossils. There is a separate label for rocks, minerals, and/or fossils (three different labels). Label and label instructions are available at the Kentucky Geological Survey website at <http://www.uky.edu/KGS/education/4H.htm>.

- 715 First year geology - consisting of 15 different specimens.
- 716 Second year Geology - consisting of 25 different specimens (up to 12 may be from previous project year; no more than 2 boxes)
- 717 Third Year Geology - consisting of 35 different specimens (up to 17 may be from previous project year; no more than 2 boxes)
- 718 Fourth Year Geology - consisting of 50 different specimens (up to 25 may be from previous project year; no more than 2 boxes)
- 719 Special collection for fifth year or more members - creative, advanced display of member's choosing which depicts a geological process, theme, story, or manufacturing process. Posters, notebooks and written narratives may be included.

2. **Number of Entries Permitted:**
 - a. County may submit ONE entry per class.
 - b. A member may enter up to two classes within ONE of the Units I through Advanced and one class in Changing Spaces in the Home Environment Division. (This means: a member's name could appear a total of three times in Home Environment--up to two times in ONE of the "units" and one time in "Changing Spaces" on the county's Home Environment Division invoice sheet.)
3. **General Rules:**
 - a. See "General Rules Applying to All 4-H Exhibitors in the Kentucky State Fair" at www.kystatefair.org. Click on "Competition," then "Premium Book", then "4-H Exhibits."
 - b. **Item must meet all requirements for the class;** otherwise, the entry will be disqualified.
 - c. Items entered must have been completed by the exhibitor within the current program year.
 - d. The decision of the judges is final.
4. **Unique Rules or Instructions:**
 - a. Exhibit must be in the unit in which the 4-Her is enrolled.
 - b. Only those entries that are properly labeled and documented will be considered for class champion.
 - c. Items normally hung on the wall, such as pictures and bulletin boards, must be ready to hang with appropriate hardware permanently attached. Items will be exhibited on a wall made of metal grids using S hooks, binder clips or zip ties. Entries mounted on mat or foam core board do not require hardware; they will be hung on the wall using binder clips.
 - d. "Refinished" item refers to an item already in use which has been given a new finish using paint or some type of seal.
5. **Additional Documentation Required:**
 - a. The following classes require documentation: 894, 895, and 897-913. Read class description carefully.
 - b. Write the member's name, county, and class number on the front of the sheet, folder or notebook of documentation. Attach documentation to item with a safety pin or binder clip.
6. **Labeling:**
 - a. Identification Card (4LO-11SO): The State Fair Entry system will generate this label. Attach it in the most visible place on the exhibit, preferably on the lower right-hand corner. Labels may be securely taped, attached with a rubber band through a hole in the corner or safety pinned (fabric items). Do NOT use straight pins.
 - b. Small label: To insure that all parts of the exhibit make it back to the county, "hide" a small label (with a minimum of the county name) on EVERY part that might become separated from others; these should not be visible to the public when displayed.
7. **Entry Instructions:** All exhibits are entered through the State Fair's electronic submission system by the county Extension staff.
8. **Awards:**
 - a. Each entry that meets the class requirements will receive a ribbon.
 - b. A champion will be named in each class.

Unit I EXHIBITS from Exploring Your Home project book

- 887 **Color Collage** (p. 10, activity 3): A collage of color created by the member to depict colors liked by the member. A collage is made up of a collection of objects (such as paper, fabric, wrapping paper, wallpaper, carpet, or other materials) artistically arranged and adhered to a mat board or foam core board.
- 888 **Texture Collage** (p.10 , see activities 1 & 2): A collection of textured items or rubbings of textured items artistically arranged and adhered to mat board or foam core board.
- 889 **Transparent finish applied to small wood object** (p. 16): Apply a clear finish such as tung oil, penetrating seal or polyurethane which does not include stain to a small wood object such as a bowl, tray, board game or box. A transparent finish allows the wood grain to show through. Judging emphasis will be on how well the object is prepared for the finish and how well the finish has been applied, not the construction of the wood object. The wood object may be made by the member, made by someone else, purchased or found. Items that are stained or finished with paint do not fit in this class.
- 890 **Simple cloth item for the home** (Sewing machine may be used but is not required): Examples: decorative pillow, tablecloth, laundry bag, place mats; footstool with a seat made of woven fabric; fabric applied to an item such as a box, plate, or lampshade. Unacceptable: purses, tote bags, backpacks, duffle bags.
- 891 **Wastebasket** (p. 14) decorated by member
- 892 **Crate Bookshelf** (p, 14) designed and created by member
- 893 **Bulletin board** (If it is to be hung on a wall, it must be ready to hang with appropriate hardware attached.)

Unit II EXHIBITS from Living with Others project book

- 894 **Decorative item for the home & photo:** decorative item created by the member as part of a 4-H Home Environment Project. Include a **photo** showing how the item fits into the home's décor.
- 895 **Simple wood item refinished** by the 4-H member: Item should have straight lines with no elaborate carvings or turnings. (The idea is to learn how to apply a new finish such as paint, stain, varnish, polyurethane, etc. to a simple wooden furnishing that's already in use.) **Documentation** is to include a "before" photo with explanation of how the item was refinished must be securely attached. Examples: refinished footstool, children's furniture, small box, tray, picture frame, bookshelves, and plant stand.
- 896 **Cloth item for the home created using a sewing machine:** Examples: hemmed tablecloth or table runner, wall hanging, pillow, pillow case, throw, embellished towels, shower curtain, chair cover, laundry bag, pet bed, valence, and curtains. Unacceptable: purses, tote bags, backpacks, duffle bags.
- 897 **Invitation and thank you letter/note:** Design an invitation and thank you letter/note for a sleepover, birthday party or other occasion of your choice. Cards/letters may be created with computer software or handwritten. Decorations on the cards/letters may be member's original artwork, computer-generated art, purchased or found decorative items. The message written in the card or letter is more important than the decorations. Write your name and county on the back of each card/letter and place each card/letter in a plastic sheet protector. (For the fair, it is best to use a fictitious address and contact information on the invitation or thank you.) Envelopes are not required for exhibit

Unit III EXHIBITS from Where I Live project book.

Include plate, beverage container(s), placemat, and napkin. Additional decorative item(s) are optional. All items that make up the place setting are to fit on the surface of the placemat. Flatware (knife, fork and spoon) **must** be included in the photo/diagram showing how all the items are arranged, but do NOT send flatware to the state fair. To insure that all pieces get returned to the member, write the name and county of the exhibitor on tape and place it on every part of the table setting in a location hidden to the public when exhibited at the fair.
- 900 **Piece of furniture refinished** (stripped, sanded, and painted or stained/sealed) by the 4-H member. This exhibit is to be made up of two parts: 1) the furniture and 2) **Documentation** is to include a “before” photo with explanation of how the item was refinished must be securely attached.
